The only digital agriculture software focusing processing time while incorporating the hig standards backed up with years of scient

In-Field Results

Create maps rapidly (no internet connection required) for faster decision making and action, without leaving the field.

Reliable Maps

Always get maps of your fields and crops at any critical stage regardless of satellite availability and cloud cover.

Trusted Results

Eliminate guesswork by analyzing crop health maps and measure issues using calibrated multispectral or full resolution RGB images.

Connected

Connect your data to platforms like the John Deere Operations Center, synchronize and access your data in-office and in-field for streamlined collaboration.
